AWS Enterprise Transformation Playbook - Artifacts Catalog

This catalog provides an overview of all 52 artifacts in the playbook. Each artifact is production-ready and can be customized for your organization.

■ Artifact Status Legend

- ■ Created: File exists and is ready to use
- ■ Template: Outline provided, customize for your org
- ■ Tool: Automation script or utility

1. Business Case & Strategy (5 artifacts)

#	Artifact	Status	Description
1	business-case-template.md	■	Comprehensive business case with ROI analysis
2	roi-calculator.md	■	Methodology for calculating transformation ROI
3	executive-summary-template.md	■	1-page executive summary template
4	vision-and-strategy.md	■	Vision statement and strategic objectives
5	value-realization-plan.md	■	Benefits tracking and realization methodology

2. Governance & Compliance (10 artifacts)

Governance Frameworks

#	Artifact	Status	Description
6	governance-framework.md	■	Governance structure, committees, decision rights
7	raci-matrix.md	■	RACI for all transformation activities
8	risk-register.md	■	Risk identification and mitigation tracking

Compliance Checklists

#	Artifact	Status	Description
9	soc2-checklist.md	■	SOC 2 Trust Services Criteria checklist
10	hipaa-compliance.md	■	HIPAA compliance requirements and controls
11	pci-dss-requirements.md	■	PCI-DSS 12 requirements checklist
12	general-enterprise-controls.md	■	NIST, ISO 27001, CIS Controls

Policies

#	Artifact	Status	Description
13	cloud-governance-policy.md	■	Cloud usage policies and standards

14	data-governance-policy.md	■	Data classification, retention, privacy
15	security-policy.md	■	Security controls and requirements

3. Change Management (8 artifacts)

#	Artifact	Status	Description
16	stakeholder-analysis.md	■	Stakeholder identification and engagement
17	communication-plan.md	■	Communication strategy and templates
18	adoption-tracking.md	■	User adoption metrics and tracking
19	executive-training.md	■	Executive leadership training curriculum
20	technical-training.md	■	Technical team training (2-5 days)
21	end-user-training.md	■	End-user training (2-4 hours)
22	certification-paths.md	■	AWS certification roadmap
23	resistance-management.md	■	Managing change resistance strategies

4. Assessment & Planning (10 artifacts)

Assessment

#	Artifact	Status	Description
24	readiness-assessment-questionnaire.md	■	Multi-dimensional readiness assessment

25	current-state-analysis.md	■	Application and infrastructure inventory
26	gap-analysis-template.md	■	Current vs. target state gaps
27	maturity-model.md	■	5-level cloud maturity assessment

Planning

#	Artifact	Status	Description
28	transformation-roadmap.md	■	Multi-year transformation timeline
29	wave-planning.md	■	Application wave grouping and sequencing
30	resource-planning.md	■	Team sizing, skills, budget allocation
31	timeline-template.md	■	Detailed project timeline template
32	budget-planning.md	■	Budget planning and tracking
33	kpi-framework.md	■	Key performance indicators definition

5. Automation Scripts (8 artifacts)

#	Script	Status	Description
34	business_case_calculator.py	■	ROI, NPV, payback period calculator
35	compliance_checker.py	■	Multi-framework compliance verification

36	readiness_assessor.py	■	Automated readiness assessment with scoring
37	kpi_tracker.py	■	Real-time monitoring KPI and alerting
38	report_generator.py	■	Automated report generation (PDF/HTML)
39	cost_analyzer.py	■	AWS cost analysis and optimization
40	dashboard_generator.py	■	Interactive dashboard creation
41	config_loader.py	■	Utility for loading YAML configurations

6. Phase-Based Playbooks (6 artifacts)

#	Playbook	Status	Description
42	01-initiation-playbook.md	■	Phase 1: Secure sponsorship, establish governance
43	02-assessment-playbook.md	■	Phase 2: Readiness, current state, gap analysis
44	03-planning-playbook.md	■	Phase 3: Roadmap, resources, risk planning
45	04-execution-playbook.md	■	Phase 4: Wave execution, migration, monitoring
46	05-stabilization-playbook.md	■	Phase 5: Hypercare, optimization, knowledge transfer
47	06-optimization-playbook.md	■	Phase 6: Cost optimization, continuous improvement

7. Configuration Files (4 artifacts)

#	Config File	Status	Description
48	kpi-definitions.yaml	■	KPI definitions, targets, thresholds
49	compliance-rules.yaml	■	Compliance rules for automated checking
50	assessment-criteria.yaml	■	Readiness assessment scoring criteria
51	requirements.txt	■	Python dependencies for automation scripts

8. Master Documentation (1 artifact)

#	Document	Status	Description
52	README.md	■	Master playbook guide and index

How to Use This Catalog

For Executives

Start with: 1. README.md - Overview 2. Business Case Template 3. Phase 1: Initiation Playbook

For Program Managers

Focus on: 1. All 6 Phase Playbooks (artifacts #42-47) 2. RACI Matrix (artifact #7) 3. KPI Framework (artifact #33) 4. Risk Register (artifact #8)

For Technical Teams

Utilize: 1. Readiness Assessment (artifact #24) 2. Current State Analysis (artifact #25) 3. All Automation Scripts (artifacts #34-41) 4. Technical Training (artifact #20)

For Compliance Officers

Review: 1. All Compliance Checklists (artifacts #9-12) 2. All Policies (artifacts #13-15) 3. Compliance Checker Script (artifact #35)

Customization Guide

Priority 1 - Start Here (Must Customize)

- Business Case Template
- Governance Framework
- RACI Matrix
- Phase 1 Playbook
- Readiness Assessment

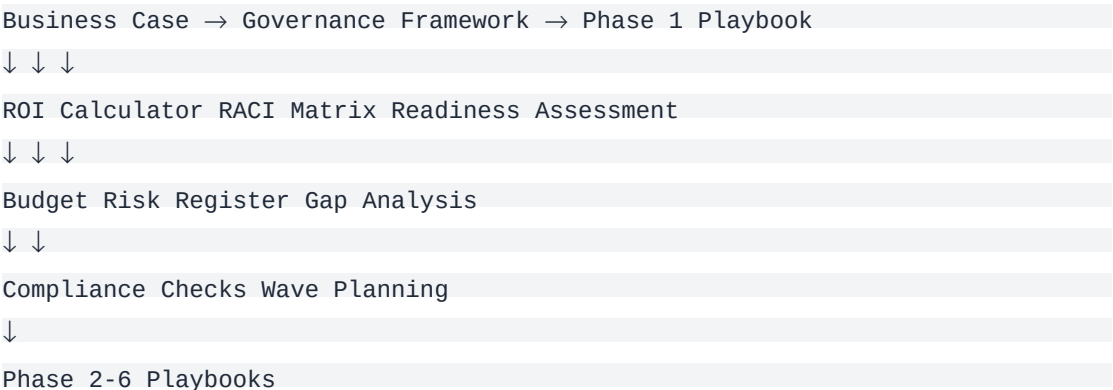

Priority 2 - Customize Soon

- All Compliance Checklists
- Communication Plan
- Training Curricula
- Wave Planning
- KPI Framework

Priority 3 - Customize Later

- Report Templates
- Meeting Agendas
- Artifact Templates

Artifact Dependencies

Maintenance Schedule

Artifact Type	Review Frequency	Owner
Business Case	Quarterly	CFO/Program Manager
Governance	Quarterly	Steering Committee
Compliance	Monthly	Compliance Officer
Training	Semi-annually	Learning & Development
Automation Scripts	As needed	Technical Team
Playbooks	After each phase	Program Manager

Version History

Version	Date	Changes	Author
1.0	2026-02-12	Initial release	EA Team

Next Steps: 1. Review README.md for full playbook overview 2. Start with artifacts marked ■ (ready to use) 3. Customize ■ templates for your organization 4. Install Python dependencies for ■ automation tools
